## How to connect to a VPN (MacOS)

- 1. Find and open the "App Store". In the search field, enter FortiClient VPN.
- 2. Click Get and wait for it to download. After downloading, open the app and agree to all the app's requests (add VPN configuration and allow pop-up notifications).

|                         | (b) VPN                               | bout                       |                           | (C) VPN               | About |

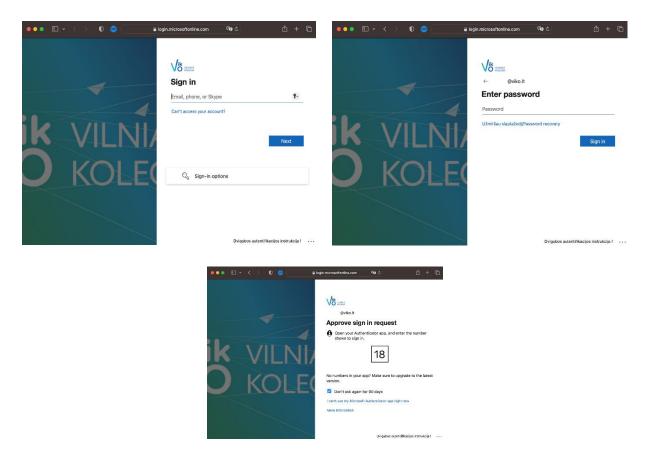

7. Upon getting there, select < located at the top left. Press **Connect** button in the new window.

8. Connect and complete the standard authentication steps.

1). Enter email address (**n.surname@ad.viko.lt** or **name.surname@stud.viko.lt**) and click **Next** button.

- 2). Enter password.
- 3). Verify yourself via the Authenticator application.

9. If everything was done correctly, the VPN should be working and this window should appear like this:

|                              | FortiClientVPN   |       |                     |
